EduClaw

AI-Powered Learning, Built for Every Student

A private AI tutor inside every student's screen.

The Problem

Students are falling behind — and teachers can't be everywhere

1 in 3
students feels lost in class

47%
say they never ask for help when stuck

1 : 30
teacher-to-student ratio on average

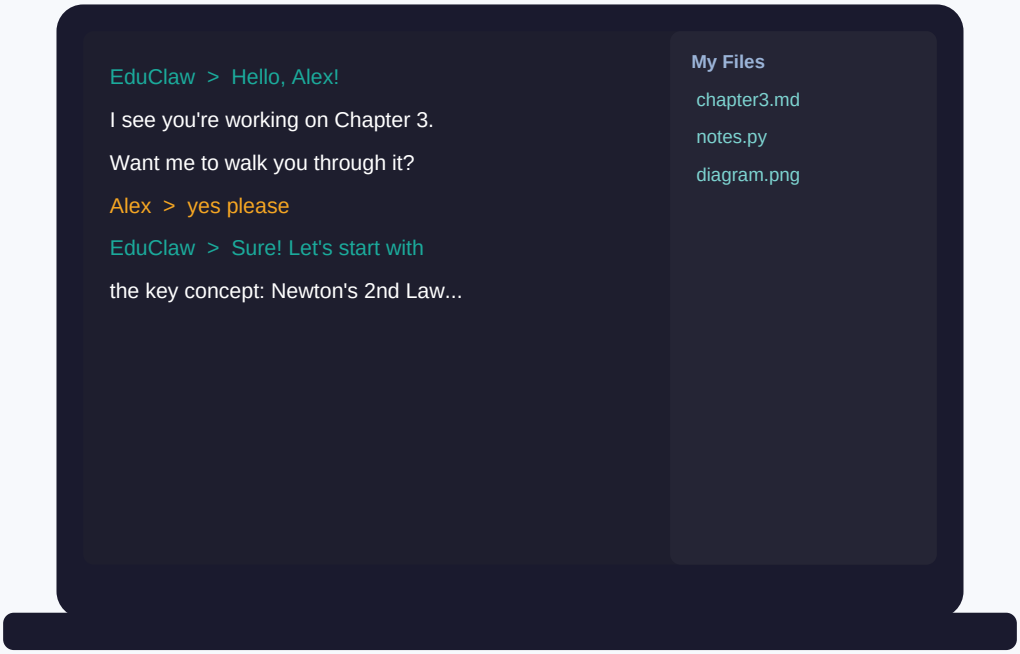
$40B
spent on tutoring annually, inaccessible to most families

Today's classrooms are overwhelmed. A single teacher cannot give personal attention to every student. Private tutors are expensive. Students who fall behind often stay behind.

The gap between students who get support and those who don't
is not a talent gap — it is an access gap.

The Solution

EduClaw — a personal AI tutor, always on, always in context



Knows Every Student

The AI knows the student's name, class, and exactly what they are studying.

Always Available

24/7 support, no waiting. Every student gets the same quality of help.

Safe & Private

Each student has their own completely separate, secure workspace.

How It Works

Three simple steps — for the student

1

Student logs in

Open a browser. Enter your school login. That's it.

2

AI tutor appears

A personal AI assistant greets the student by name, knows their subject, and is ready to help immediately.

3

Student learns

Ask questions, run code, see diagrams — all inside one screen. Files save automatically.

What the teacher sees

- Every student's progress in real time
- Instant alerts if a student is struggling
- Full control — same classroom, smarter tools

Why EduClaw is Different

Not another chatbot. A full learning environment.

Others	Their gap	EduClaw
Generic AI chatbots	No memory of who you are	**Knows student name, class, progress**
Online courses	No real help when stuck	**Always-on AI tutor, answers instantly**
Private tutors	Expensive — $40–$100/hr	**Available to every student, any time**
School IT tools	No AI, no personalisation	**Built for AI-first learning from day one**
Traditional LMS	Static — no interaction	**Live, interactive, two-way AI session**

EduClaw is the only platform that gives every student

a personalised AI teacher — inside a safe, school-managed environment.

THE STUDENT EXPERIENCE

EduClaw — Alex's Workspace — Physics 101

EduClaw: Hi Alex! I can see you're on Chapter 3 — Forces.

EduClaw: Would you like me to explain Newton's 2nd Law visually?

Alex: yes and can you show the formula?

EduClaw: Of course! Here it is: F = m × a

EduClaw: Force = mass × acceleration. Let me run an example...

Python: mass = 5 # kg

Python: accel = 3 # m/s²

Python: print(mass * accel) # → 15 N

EduClaw: There — 15 Newtons. Want to try changing the numbers?

Ask anything about your lesson...

My Files & Class Materials

assignment2.pdf

F = m×a graph — auto-generated

Every student sees their own private workspace — files, AI chat, and course materials, all in one screen.

Privacy & Safety First

Every student's work is completely separate and secure

Data stays in school

Nothing leaves your institution's server

No cross-student access

Students cannot see each other's files or chats

Teacher oversight

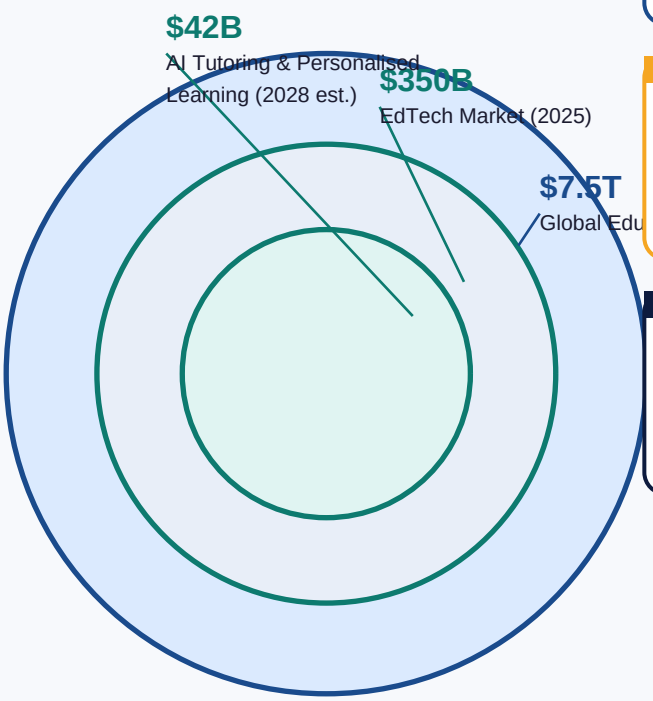
Admins can monitor, pause, or reset any session

No internet for students

Each workspace is isolated from the open web

Market Opportunity

Education technology is one of the fastest-growing sectors globally



1.6B

School-age students worldwide

3×

Faster learning with 1-on-1 tutoring (Bloom's 2-sigma study)

68%

Of parents willing to pay for AI tutoring tools

$4,200

Average annual spend per student on supplemental learning (US)

Business Model

School-first SaaS — simple, scalable pricing

Starter

Free

- Up to 30 students
- 1 classroom
- Core AI tutoring
- Basic teacher dashboard

School

$8 / student / month

- Unlimited students
- All subjects & classes
- PDF course materials
- Admin controls & reports
- Priority support

District

Custom pricing

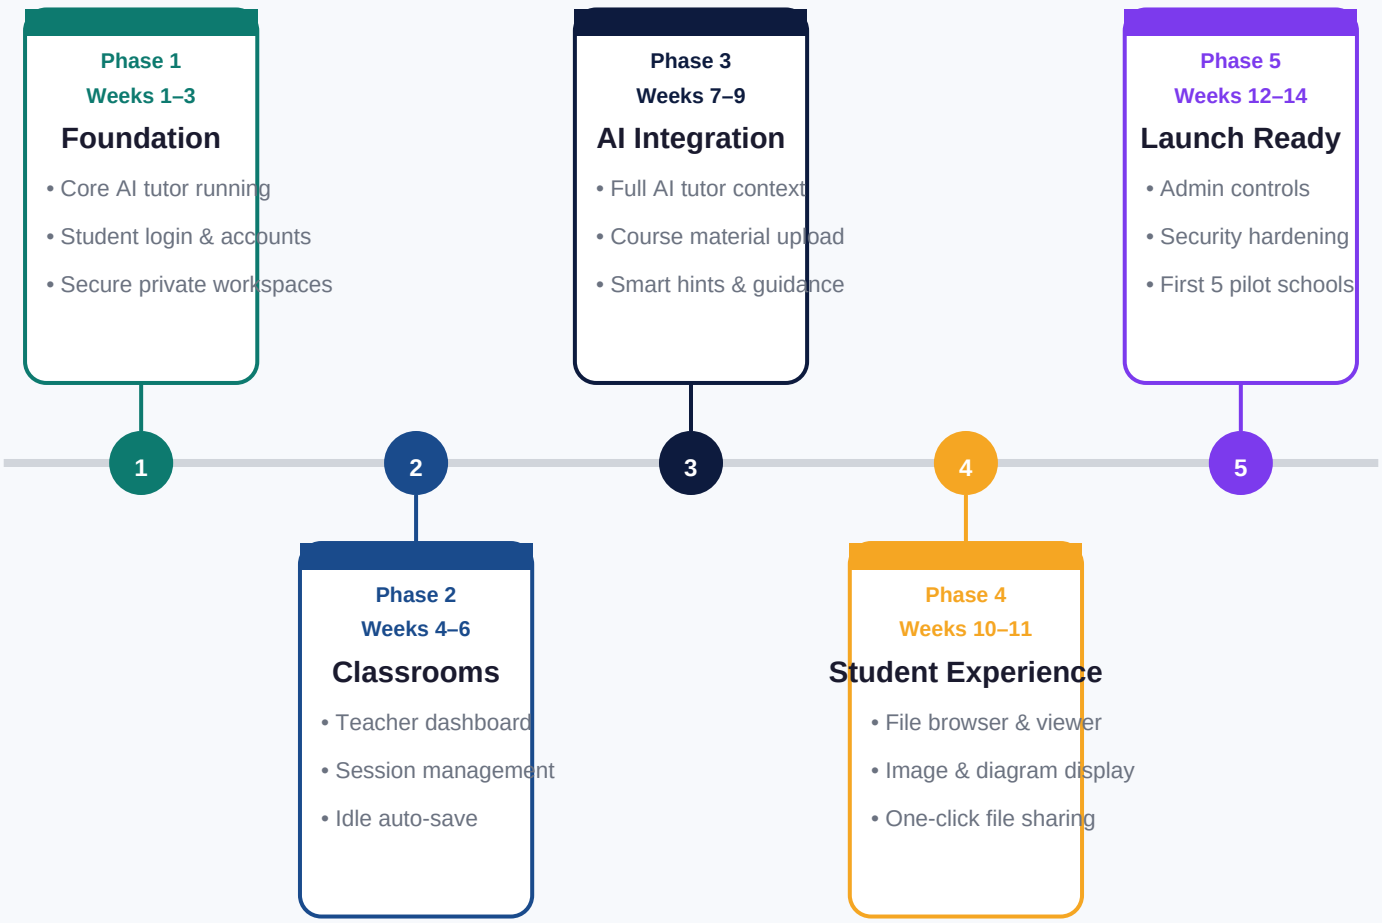
- Multi-school deployment
- Curriculum integration
- Dedicated success manager
- Custom AI personas
- SLA guarantee

Primary revenue: per-student monthly subscription · Secondary: district data insights (anonymised) · Tertiary: content marketplace

Target: 500 schools in Year 2 = $15M ARR at average school size of 400 students

Roadmap to Launch

14 weeks from today to first paying school



The Ask

We are raising a seed round to bring EduClaw to 500 schools.

$2.5M

Seed Round

45%	25%	20%	10%
Engineering & Product Build	School Sales & Partnerships	Infrastructure & Security	Operations & Legal

What this funding achieves:

- Launch with 5 pilot schools — Month 3
- 50 paying schools, break-even on infra — Month 9
- Series A ready at 500 schools — Month 18
